# ICE5

## INTEGRATED CONTROL ENVIRONMENT

# ICE5

**SHOCKWAVE** introduces its latest ICE (Integrated Control Environment) design, the new **ICE5 Console**. Designed to provide the ultimate in shock mitigation to elite military organizations around the globe. The **ICE5** is a patented product, specifically designed for tactical multi-mission operations. The **ICE5** offers a 3-axis suspended cockpit that enables crew to operate and monitor vessel systems throughout the vessels full range of operating parameters. In addition to providing comfort and protection to the crew, the ICE also protects sensitive electronics from wave impact when operating at high speeds in heavy seas.

### FEATURES

- Multi-Axis Suspension Dampens Wave Impact
- 12" Fox Float Suspension – AUTOTUNE Automatic Adjustment Available
- Race Proven 4 Link Suspension with Large Anti Roll Bar
- Integrated Welded Aluminum Construction
- Optional Front Mount Gunner or Spotter Seat on Quick Connect Mount

### BENEFITS

- Superior Shock & Vibration Protection for Crew and Equipment
- Excellent Ergonomics and Crew Communication
- Improved Economy of Weight, Space and Equipment Integration
- Occupant Moves with Controls for Ease and Accuracy of Operation

## ICE5

SW-ICE5003

The ICE5 features an integrated radio box aft of the helm seats. There is also an optional, removable front seat utilizing quick connect system for missions that require a crew member ahead of the console, offering users flexible, mission specific, seating configurations. Multifunction displays and radios located on the aft face of the ICE5, offer enhanced situational awareness to command and control personnel. This new ICE5 Console re-sets the bar for shock mitigation in the most demanding conditions.

The ICE5 is available with optional accessories including a windscreen, full windshield, folding radar arch, lap belts, shoulder belts and seat slides. Please contact sales for more information and pricing.
