SHOCKWAVE Seats announces the new **S6 SUSPENSION MODULE** with height adjust. Designed for light commercial applications, the S6 is built for the marine industry. It is ideal for any vessel that regularly has people of varying heights operating offshore in heavy seas, such as search and rescue, law enforcement, fisheries, government agencies and commercial boats.

SHOCKWAVE Seats now offers a purpose-built suspension module with a fully integrated height adjust, actuated with a ratchet mechanism for precise adjustability.

FEATURES

- Fully integrated height adjust raises the seat 3" (75mm)
- Designed for heavy sea conditions and operating environments
- Can handle occupants up to 300lbs with deck accelerations up to 6g's
- Finished in black and engineered to eliminate corrosion points
- Custom tuned SHOCKWAVE/FOX Float 3 shock absorber

BENEFITS

- Pair with a SHOCKWAVE Seat or use an existing seat
- Easy access to fill valve in all height positions
- Easily combine S6 with the SHOCKWAVE swivel, slide, or swivel/slide
- Integrated height adjust offers consistent suspension performance in all positions

S6 SUSPENSION MODULE

SW-07366

The S6 fills the gap between the S5 recreational suspension and the S2 professional suspension seat to offer a broader range of applications to our customers.

The S6 Suspension Module provides 5.5" of travel to mitigate the shock of 6g impacts for occupants up to 300lbs. Pair the S6 Suspension with our Corbin2 seat and accessories to maximize the flexibility of this seat, or pair it with an existing seat.
